## 2010 ANNUAL MEETING OBJECTIVES

### Adult Reconstructive

Upon completion of the Adult Reconstruction lecture series, participants will have an advanced understanding of the current trends and concepts that are emerging. These lectures will review many of the current developments in hip and knee arthroplasty that will enhance the knowledge of the participants and further the growth of their practices.

### Foot and Ankle

Upon completion of this session, the participants will be able to identify common sports & traumatic injuries of the foot & ankle, develop an understanding of the standard treatments for injuries of the foot & ankle, and learn about new treatments & technology in the treatment of injuries of the foot & ankle.

### General Session

Upon completion of this session, the participants will have learned the varied roles of an orthopedic surgeon that are performed in addition to treating patients and performing surgery, will understand the urgency with transfer of healthcare delivery, using a spine surgery center model, and will have learned how orthopedic surgeons become entrepreneurs and how orthopedic surgeons interact with industry and manufacturers of implants and surgical devices.

### Hand

Upon completion of this session, participants will have learned the latest treatments and techniques for total elbow arthroplasty, Essex Lopresti, distal radius, and acute fractures. They will also have learned how to evaluate and treat PIP joint dislocations.

### Pediatrics

Upon completion of this session, participants will have reviewed important pediatric cases involving current concepts in slipped capital femoral epiphysis and limb deformity basics. Participants will also have learned updates in treatment for osteochondritis dissecans in the adolescent athlete and will review challenging cases in pediatric sports medicine. Sessions devoted to upper and lower extremity trauma will allow participants to ask questions and discuss current and future trends and techniques.

### Shoulder and Elbow

Upon completion of this session, participants will have learned Pathoetiology of proximal humerus malunions and nonunions, the appropriate clinical evaluation and classification of proximal humerus malunions and nonunions, nonoperative and operative

treatment of proximal humerus malunions and nonunions, and appropriate preoperative surgical planning and techniques in treating malunions and nonunions.

### Spine

Upon completion of this session, participants will have learned the latest issues in spine surgery including traditional non-operative care, surgical management and problems associated with lumbar spinal stenosis as well as the latest techniques in positive surgical outcomes and pain management.

### Sports

Upon completion of this session, the participants will have reviewed current topics on common sideline sports injuries and will have learned current treatment and preventative recommendations of these conditions. The practicing physician will be able to utilize the information learned in this session in their practice.

### Trauma

Upon completion of this session, the participants will understand the updates in fracture management of the tibia and the femur, including the update in 2010 operative techniques of both.

### Upper Extremity Nerve Problems/Ailments

Upon completion of this session, the participants will have learned about common and uncommon upper extremity nerve issues, including compressive and traumatic nerve lesions, and the diagnosis and treatment of nerve lesions from the perspective of the surgeon as well as the neurologist.

#### Disclaimer

The material presented at the Annual Postgraduate Seminar has been made available by the American Osteopathic Academy of Orthopedics for educational purposes only. This material is not intended to represent the only, nor necessarily best, methods or procedures appropriate for the medical situations discussed, but rather is intended to present an approach, view, statement or opinion of the faculty which may be helpful to others who face similar situations.

The AOO disclaims any and all liability for injury or other damages resulting to any individual attending a session and for all claims which may arise out of the use of the techniques demonstrated therein by such individuals whether these claims shall be asserted by a physician or any other person.

No reproductions of any kind, including audiotapes and videotapes, may be made of the presentations at this meeting.
